## FSA AND MADDEN ENGINEERING MERGER

FSA is pleased to announce the merger of Madden Engineering Services Inc. of Sherman's Dale, PA with our growing company. The merger is a part of FSA's goal to increase its municipal engineering work and to provide expanded services to our clients throughout the Central Pennsylvania region and beyond. Madden Engineering presently represents multiple municipalities and townships out of its Sherman's Dale office. John Madden, Professional Engineer and his staff will be retained along with their current office location to continue to provide the high quality responsive service that their clients have come to expect. The merger will allow Mr. Madden to concentrate on his passion for designing practical and sound engineering solutions for his clients. John will actively work with FSA's Carlisle office, managed by Justin Doty, PE to continue to serve all of Madden Engineering's present customers and to provide a wider range of engineering, surveying, land planning, landscape architecture, and environmental engineering services to both existing and new clients.

FSA's goal of total client satisfaction will be enhanced by the addition of Madden Engineering's solid reputation and will combine the expertise and talents of all four offices: Carlisle, Greencastle and Sherman's Dale, Pennsylvania and Hagerstown, Maryland. These offices, through state of art technology, are interconnected and will interface with one another as each job and each client requires in order to provide our clients with the BEST of our talents. The acquisition of Madden Engineering will allow FSA to continue its growth in the Central Pennsylvania region while reinforcing our commitment to Carlisle and our ability to meet the growth of the I-81 corridor from Carlisle to Shippensburg, Chambersburg and Greencastle. FSA also works with customers from Virginia, West Virginia, Maryland and Pennsylvania along the I-81 corridor and throughout the quad-state region.

FSA prides itself on client centered work across our multi-disciplinary firm providing engineering, surveying, landscape architecture, planning and environmental engineering services to a broad based clientele. Our customers are made up of individual property owners, local private developers, regional, national and multi-national developers and corporations, along with local, state and national public sector clients and non-profit entities.

We look forward to the energy and abilities that FSA's newest employees will bring to our dynamic company. We are large enough to serve all of our client's needs but 'small' enough to listen to each customer individually.
